FUOYE NEWS BREAK

Official Newsletter of Federal University Oye-Ekiti

Motto: Innovation and Character for National Transformation

FUOYE Management Refutes False Rumours

The Management of FUOYE wishes to state as follows:

- That there is no iota of truth in the rumours making the rounds that Principal Officers of the University have been paid relocation allowance,
- That the University does not have any plans to pay staff relocation allowance as this is not provided for by the Government. It will be noted, however, that management had earlier promised to pay hazard allowance

when her Internally Generated Revenue (IGR) improves.

- Management equally restates that the allegation that the Acting Bursar transferred the amounts ranging between ₦2 billion and ₦3 billion from Fidelity Bank to an undisclosed account at FCMB is wicked, false and unsubstantiated as the statement of University accounts has been thoroughly reviewed and no such movement was discovered.

FUOYE Students Dissociate Themselves from Planned Staff Protests

Management also wishes to amplify that students of Federal University Oye-Ekiti have dissociated themselves from any planned protests as alleged in some quarters. Law-

abiding staff and students should therefore go about their normal duties as Management will not allow a few disgruntled elements to create anxiety in the system and cause confusion.

Our Vision

To become an academic giant, the pace-setter among universities in the Third World, in the quality of its scientific research, the level of its innovative teaching, and the robustness of its community service.

Our Mission

To become an institution of first choice recognised for providing critical opportunities for student success; acknowledged as a primary and engaged regional and global resource for entrepreneurial educational and best practices in mining and farming technologies; and valued as a university where there are faculty, students, and professional staff who are active in integrating cutting-edge technology in multidisciplinary and disciplinary research.
